Newark, NY August 14, 2019

Newcut is pleased to announce achievement of AS9100D with ISO9001 certification.

The internationally recognized AS9100D Quality Management System standards enlarges the requirements of ISO 9001 to meet the rigorous demands of the aerospace and defense industries. This certification reflects Newcut's dedication to meeting and exceeding the increasingly stringent industry requirements and commitment to continuous improvement.

According to Illa Burbank, President of Newcut, "Our team has worked hard to fulfill the commitment to deliver quality products and unsurpassed customer satisfaction by verifying that the quality management system in place emphasizes continual process improvement and reliably meets customer expectations".

To achieve certification, Newcut was required to participate in a meticulous process. The initial stage was to develop policies and procedures for reporting, training, preventative maintenance, internal audits and more. Our external auditor validated the compliance, confirmed the implementation of the process and determined the effectiveness of the process. Regularly scheduled audits will ensure compliance and encourage continuous improvements.

Operations at Newcut received AS9100D certification following extensive quality system audits by NSF, a management systems registrar.

About Newchem Inc. dba Newcut

Located in Newark, NY, Newcut is a photochemical machining manufacturer specializing in precision, thin sheet metal parts capable of handling prototype to high volume production.
